# BINDESH TRIPATHI

Ph.D. candidate, Department of Physics  
University of Wisconsin-Madison, Wisconsin  
Email: [bttripathi@wisc.edu](mailto:bttripathi@wisc.edu)  
Phone (office): 608 890 0902

## Research interests

I study theoretical and computational plasma physics, with particular emphasis on: instabilities and waves of fluids and plasmas, their nonlinear saturation, turbulence and transport, energy transfer and cascade processes, statistical closure models, astrophysical and geophysical fluid dynamics, astero-seismology, and magnetic dynamos. My underlying pursuit in all of these is understanding complex physical processes to build a reduced mathematical model, which I then test with massively-parallel numerical simulations generating tens of terabytes or more of data. I keep close interest on mathematical physics, Wentzel–Kramers–Brillouin theory, perturbation methods, and asymptotics.

## Education

2019–now	<b>Ph.D. in Physics (Plasma)</b>	University of Wisconsin-Madison
2019–2021	<b>Master's degree in Physics</b>	University of Wisconsin-Madison
2014–2018	<b>Undergraduate degree in Physics</b>	St. Xavier's College, Tribhuwan University, Nepal

## Experience/Positions

2020–now	<b>Graduate Research Assistant</b> Advisors: Prof. Paul W. Terry, Prof. Ellen G. Zweibel, and Dr. M.J. Pueschel	UW-Madison, Wisconsin
2019–2021	<b>Graduate Teaching Assistant</b> Taught for four semesters introductory physics to approx. 50 students/semester, majoring in biological sciences	UW-Madison, Wisconsin
2018-2019	<b>Research Intern, Nordic Institute for Theoretical Physics (NORDITA)</b> Advisor: Dr. Dhrubaditya Mitra (asteroseismology and perturbation methods)	Stockholm, Sweden
2017-2018	<b>Research Intern, Center of Excellence in Space Sciences India and IISER-Kolkata</b> Advisors: Prof. Dibyendu Nandi (dynamos) and Prof. Soumitro Banerjee (nonlinear dynamics)	Kolkata, India

---

## Competitive awards/fellowships/honors

2022	<b>Callen Award</b> Awarded annually to an outstanding plasma theory Ph.D. student in the department of physics and the department of engineering, combined; Award funds donated by Professor Emeritus James D. Callen	UW-Madison, WI
2022	<b>Student Travel Grant awarded by the Topical Group in Plasma Astrophysics, Americal Physical Society</b> Awarded \$1500 to participate and present talks at the Division of Plasma Physics Annual Meeting	Spokane, WA
2022	<b>Best student poster prize</b> Awarded at the International Sherwood Fusion Theory Conference 2022 ( <a href="http://www.sherwoodtheory.org/sw2022/index.php">http://www.sherwoodtheory.org/sw2022/index.php</a> ; <a href="https://www.sherwoodtheory.org/meeting_highlights/Highlights.2022.pdf">https://www.sherwoodtheory.org/meeting_highlights/Highlights.2022.pdf</a> )	Santa Rosa, CA
2021	<b>Van Vleck Award</b> Awarded to an outstanding graduate student in the physics department, based on annual academic achievement; Award funds donated by Van Vleck Foundation Board of Directors ( <a href="https://www.physics.wisc.edu/departement/awards/">https://www.physics.wisc.edu/departement/awards/</a> )	UW-Madison, WI
2020	<b>Best Teaching Assistant Award</b> Awarded for the spring semester 2020, based on teaching excellence in the physics department ( <a href="https://www.physics.wisc.edu/departement/awards/">https://www.physics.wisc.edu/departement/awards/</a> )	UW-Madison, WI
2016	<b>Best Student Award in a winter course on "Hydrodynamic Stability and Dynamo Theory"</b> For excellent performance in presentations, class tests, and assignments during a graduate level 2-week long course	Warangal, India
2013	<b>Champion of Nepal Physics Olympiad</b> Selected by the Nepal Physical Society to represent Nepal in the International and Asian Physics Olympiads	Kathmandu, Nepal

## Successful Computing Allocation Requests Co-authored

2021, 2022, 2023	<b>Gyrokinetic Plasma Microturbulence and MHD Simulation in Fusion and Basic Plasmas</b> –Contributed to the proposal, but the PI was the lead author; –Resources awarded: 13 million CPU-hours (in 2021), 19 million CPU-hours (in 2022), 82 million CPU-hours (in 2023); XSEDE and ACCESS supercomputing resources; –PI: P.W. Terry, Co-PIs: <b>B. Tripathi</b> , S.-W. Tsao, T. Jitsuk, M.J. Pueschel	
---------------------	-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	--

## Invited Talk(s)

2022 Oct	<b>A New Mechanism for Sequestering Magnetic Energy at Large Scales in Shear-Flow Turbulence</b> 64 <sup>th</sup> Annual Meeting of the APS Division of Plasma Physics, <a href="https://meetings.aps.org/Meeting/DPP22/Session/JI01">https://meetings.aps.org/Meeting/DPP22/Session/JI01</a>	Spokane, WA
----------	-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	-------------

## Seminar(s)

2023 Jan	<b>A New Mechanism for Sequestering Magnetic Energy at Large Scales in Shear-Flow Turbulence</b> Nordic Dynamo Seminar at Nordic Institute for Theoretical Physics, Sweden, <a href="https://indico.fysik.su.se/event/8021/">https://indico.fysik.su.se/event/8021/</a>	Virtual
----------	-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	---------

---

## Selected contributed presentations/conferences

2022 Oct	<b>Mode coupling, energy transfer, and saturation models of Kelvin-Helmholtz-instability-driven turbulence</b> 64 <sup>th</sup> Annual Meeting of the APS Division of Plasma Physics, <a href="https://meetings.aps.org/Meeting/DPP22/Session/TO03.5">https://meetings.aps.org/Meeting/DPP22/Session/TO03.5</a>	Contributed talk, Spokane, WA
2022 Apr	<b>Transport reduction in forced shear layers due to stable modes</b> International Sherwood Fusion Theory Conference 2022, Poster here	Poster presentation, Santa Rosa, CA
2021 Nov	<b>Transport in Stellar Interiors</b> Kavli Institute of Theoretical Physics	Workshop, Santa Barbara, CA
2021 Nov	<b>Stable-mode-mediated nonlinear saturation, transport, and small-scale dissipation in MHD Kelvin-Helmholtz turbulence</b> 63 <sup>rd</sup> Annual Meeting of the APS Division of Plasma Physics, Poster here	Poster presentation, Pittsburg, PA
2021 Aug	<b>Stable-mode-mediated turbulence saturation and small-scale dissipation in MHD Kelvin-Helmholtz unstable flows</b> International Sherwood Fusion Theory Conference 2021, Slides here	Contributed talk, Virtual meeting
2020 Nov	<b>Modeling shear-flow driven forced MHD Turbulence</b> 62 <sup>nd</sup> Annual Meeting of the APS Division of Plasma Physics, Slides here	Contributed talk, Virtual meeting
2020 Nov	<b>Surface Signatures of Subsurface Magnetic Fields</b> 62 <sup>nd</sup> Annual Meeting of the APS Division of Plasma Physics, Slides here	Contributed talk, Virtual meeting
2019 Mar	<b>Solar Helicity Workshop, Nordic Institute of Theoretical Physics</b> Participated in a month-long program, and presented a talk Slides here	Contributed talk, Stockholm, Sweden
2018 Aug	<b>Origin and Recovery From Grand Minima Mediated via Noise in Solar Magnetic Cycles</b> Focus meeting in International Astronomical Union's 30 <sup>th</sup> General Assembly; Slides here	Contributed talk, Vienna, Austria
2018 Feb	<b>Origin and Recovery from Grand Solar Minima</b> International Astronomical Union Symposium, IAUS 340, Poster here	Poster presentation, Jaipur, India

## Professional Service

2022–now	<b>Peer-reviewer for Physical Review Letters</b> Reviewed article and wrote a co-referee report	
2022–2023	<b>Physics Department Colloquium Committee Member</b> Served as a student representative on faculty committee, <a href="https://www.physics.wisc.edu/departments/committee/">https://www.physics.wisc.edu/departments/committee/</a>	UW-Madison
2021–2022	<b>Organizing Committee Member of Peer Mentoring Program</b> Assisted in ideating, implementing, and executing the Peer Mentoring Program, under the auspices of the Physics Graduate Student Council, while also peer-mentoring incoming graduate students in both the academic years 2020–2021 and 2021–2022; <a href="https://pgsc.physics.wisc.edu/pm/">https://pgsc.physics.wisc.edu/pm/</a>	UW-Madison

## Teaching Experience

2019–2021	<b>Teaching Assistant (TA), Introductory calculus-based physics for undergraduates majoring in biological sciences</b> Taught for four semesters, with responsibilities of organizing discussion classes for approx. 50 students each semester, and leading laboratory sessions, office hours, and grading class assignments and exams; Recognized three times with “Excellent” rating—the highest among six possible ratings—and once with “Very Good,” by the TA coordinator, based upon course instructor’s and students’ evaluations; Best TA award in Spring 2020 among all TAs in the physics department
2014–2017	<b>Private tutor to high-school students, Physics Olympiad trainer through Nepal Physical Society and several high schools</b> I would be happy to discuss more about these memorable years if asked.

## Olympiads

2014	<b>Competed in the Asian Physics Olympiad</b>	Singapore
2013	<b>Competed in the International Physics Olympiad</b>	Copenhagen, Denmark
2013	<b>Champion in the Nepal Physics Olympiad</b>	Kathmandu, Nepal
2012	<b>Ranked 6<sup>th</sup> in the Nepal Physics Olympiad</b>	Kathmandu, Nepal
